ADAPTIQ AUDIO CALIBRATION SYSTEM DOWNLOAD Jun 13, 2018 I have a Bose 300 accustimas sound bar with sub and headset. I tried the menu . 5/5 - I'd definitely recommend this for either brand. It's not just a volume control, it's a better overall volume control and it does keep the volume high enough for me to enjoy the sound bar without having to crank the volume up all the way. Especially if you want to watch TV or listen to music while eating or watching the kids, you'll be glad of this feature. 5/5 I was skeptical when I purchased the Bose Sound bars because they are fairly expensive. They had their warranty so I was a little skeptical that it would last because they are used on construction sites and they need to be . 5/5 - Perfect! Lasts for weeks and the volume is never too low or to loud. Amazing product to have - I absolutely love it! I bought the Bose soundbar about 3 weeks ago. Since then I have tried everything under the sun and it still won't work. I live in a 1 room home with a loft I am trying to learn as much as I can so when the sound bar goes to sleep I will be one step ahead. I really don't know what else to do. Bose customer service offered no help. Do not buy this product if you want to use your soundbar in your den where you want to watch tv or enjoy music. It is a bit pricey but worth it because if I get sound bar dead which is why I bought it in the first place I will have to buy another soundbar and then to get it working again. Bose customer service wants me to speak to a Bose rep in India because I am not a paid customer that's why I'm writing this review. This Bose product is a waste of money I wish I would of listened to all those who had the same problems as I am having! I bought the Bose soundbar about 3 weeks ago. Since then I have tried everything under the sun and it still won't work. I live in a 1 room home with a loft I am trying to learn as much as I can so when the sound bar goes to sleep I will be one step ahead. I really don't know what else to do. Bose customer service offered no help. Do not buy this product if you want to use your soundbar in your den where

. Run ADAPTiQ audio calibration using the Bose Music App. ADAPTiQ audio calibration system download. ADAPTiQ audio calibration system download.
